## PRODUCT DESCRIPTION

Extremely innovative and luminous: Our Ledlenser HF8R Signature is the ultimate high-end model. Thanks to an efficient cooling system, the HF8R Signature is extremely powerful and offers perfect light at any time. Our patent-pending Adaptive Light Beam Technology allows automatic dimming and focusing. Thus, the HF8R is our first headlamp which can be used hands-free and requires no manual control at all. Moreover, it comes with red, blue and green front light and allows virtually seamless focusing thanks to our patent-pending Digital Advanced Focus System. You can remotely control and personalize the HF8R Signature via Ledlenser Connect App. Other features include the aluminum housing as well as the reflective headband.

- Dims and focuses automatically thanks to our patent-pending Adaptive Light Beam technology; hands-free use
- Powerful headlamp with up to 2000 lumens as well as red, green and blue front light
- Remote control and personalization via Ledlenser Connect App
- Virtually seamless focusing with our patent-pending Digital Advanced Focus System; intuitive-to-use Focus Wheel
- Suitable for continuous immersion in water (IP68)

## PRODUCT SERIES

Outdoor enthusiasts will love our HF-series Signature models. The premium headlamps combine innovative technologies with high luminosity. Apart from white light, they offer red, green and blue light as well as an extensive scope of supply and headbands with reflective elements for safety. These features make them the best option for athletes, hunters and fishers – and allow them to keep their hands free.

## FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/hrs/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

5) Charging time varies by hardware used.
